File name option
 Override default File name

File name

- File name includes User name
- File name includes date
- File name includes time

Arbitrator

Arbitrator

- Add an option to Insights CLI menu to validate a file using the checksum.
- **Arbitrator collection scripts** - Metaswitch probes and dashboards for collecting performance data via SNMP have been added.
- **Arbitrator Inquiry** - SNMP basic collection for (Sonus / Ribbon) SBC devices.

DS9 Hawaii

DS9 NetFlow

- Create standard NetFlow alerts. Support added for the detection and generation of “NoFlow”, “Top Application”, and “Application Threshold” alerts.
- MinIO bucket creation due to order flow change with move to Hawaii. Upon change of IP/hostname or software update we will stop and start the minio service.

Small Enhancements

- User should have ability to change their own password
- Definitions drop-down menu reposition
- Dashboard Timeout
- Dashboard UI Table widgets auto render epoch dates of 0
- Dashboard - only superuser can edit password policy
- Reporter Enhancement: add scrollbar to Date Range Picker
- Add multi-line support to the SSHD config
- Update upgrade menu to allow specification of patch file
- Move RIS_TREND table under config of RTMT
- MS Teams - Customer filters for multi tenancy - Common “tenant_id” field has been added to most MS Teams dashboard definitions
